GENERATED Releases Fourth Full-Length Album "PSCHPTHY"

A Journey into the Human Psyche and the Facades We Wear

Moscow, November 17, 2024 — **GENERATED** is pleased to announce that their fourth full-length album, **PSCHPTHY**, is now available on [Spotify](#) and all other music streaming platforms. The album offers a daring fusion of genres, blending the raw energy of metal/core with the rhythmic intricacies of phonk and trap, enriched by the dramatic layers of operatic neoclassics and even some smooth R&B undertones.

Lyrically, PSCHPTHY tells the story of a clinical psychopath who begins dating a woman named Artemis. Realizing that Artemis deserves more, the protagonist chooses to leave her, urging her to find happiness with someone “normal.” Tragically, this decision seals the fate of both characters and a few more.

Quote from the Artist

“We wanted to create a story that not only entertains but also makes people think about the masks we all wear,” says [Vova Zakharov](#), the human behind the project. “This album explores how appearances can be deceiving and how complex the notion of 'normal' really is.”

About GENERATED

GENERATED is an innovative music project that combines human artistry with artificial intelligence. Just like its previous work, the creation of PSCHPTHY goes far beyond simple AI-generated outputs and involves an extensive process of human-machine iteration and collaboration. This approach allows for exploration of new musical landscapes and storytelling techniques.

You can listen to the band's full catalog on [Spotify](#) and other streaming platforms.
